PROFESSIONAL SUMMARY

Computer Science student with focused practical experience in fullstack web engineering using TypeScript, React, Go, and Laravel. Proven background in designing multi-tenant systems, enforcing granular role-based access control (RBAC), and orchestrating containerized environments. Experienced in developing responsive, production-ready web platforms with validated database architectures.

EDUCATION

Esa Unggul University <i>Bachelor of Computer Science</i>	Jakarta, Indonesia 2023 – 2027
---	-----------------------------------

EXPERIENCE

Fullstack Developer (Internship) <i>PT Mitra Cerdas Nusantara</i>	Aug. 2025 – Jan. 2026 <i>Jakarta, Indonesia (Remote)</i>
- Engineered fullstack web modules with React and Laravel using Inertia.js, eliminating manual REST boilerplate. - Architected secure user authentication workflows utilizing JWT tokens and custom route authorization middleware. - Containerized local development workflows using Docker Compose, standardizing onboarding across teams. - Indexed relational data models on MySQL to optimize query execution across operational reporting modules.	
Core Team – Curriculum <i>Google Developer Group on Campus (GDGoC), Esa Unggul University</i>	Oct. 2025 – Present <i>Jakarta, Indonesia</i>
- Delivered technical curricula and mentored 80+ peers across Study Jams on modern web development patterns. - Engineered a student submission review engine using Go and React with RBAC and administrative audit panels.	

PROJECTS

AudioNara <i>Go, Flutter, PostgreSQL, Redis, Docker</i> GitHub	May 2026 – Jul. 2026
- Engineered a high-performance cross-platform music streaming platform utilizing a Go backend and Flutter client. - Architected a containerized infrastructure leveraging PostgreSQL 16 for persistent storage and Redis 7 for caching. - Integrated the Resend API to automate reliable delivery of transactional emails and notifications.	
AgriSync <i>React, Zustand, Supabase, PostgreSQL</i> GitHub	Feb. 2026 – Apr. 2026
- Built a multi-tenant plantation management and field-reporting platform, letting multiple organizations track field operations from one dashboard. - Enforced tenant data isolation with Supabase Row-Level Security policies and vault-managed secrets on PostgreSQL. - Automated report webhooks and email alerts with Edge Functions and the Resend API.	
Inventory Management System <i>Laravel, React, Inertia.js, MySQL</i> GitHub	Aug. 2025 – Jan. 2026
- Built a containerized, role-based inventory platform with onboarding wizards and real-time transaction dashboards across multiple locations. - Secured workflows with centralized permissions and audit-trail logging for accountability across user roles.	
El Ngadu <i>PHP, Laravel, React, MySQL</i> GitHub	Mar. 2025 – Aug. 2025
- Built a full-stack complaint management system with role-based access for admin and user workflows. - Designed a case-tracking pipeline to log, assign, and monitor complaints end-to-end.	
Rumah Kosim Books <i>SvelteKit, MySQL</i> GitHub	Sep. 2024 – Jan. 2025
- Built a full-stack bookstore app with user authentication and session management. - Implemented CRUD functionality for inventory and catalog management.	

CERTIFICATIONS

Go (Intermediate) Skill Certification <i>HackerRank</i>	Jul. 2026
React (Basic) Skill Certification <i>HackerRank</i>	Jul. 2026
EF SET English Certificate (C2 Proficient) <i>EF Standard English Test</i>	2026

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, PHP, SQL, Dart
Frontend: React.js, Next.js, SvelteKit, Flutter, Tailwind CSS, Zustand, Inertia.js
Backend & Storage: Laravel, Node.js, PostgreSQL, MySQL, Supabase, Redis, REST APIs
DevOps & Tools: Docker, Docker Compose, Git, Linux, Postman
Spoken Languages: English (C2 Proficient), Indonesian (Native)
